

**TARIFF N.M.S.
(Net Metering Service)**

AVAILABILITY OF SERVICE.

Net Metering is available to eligible customer-generators in the Company’s service territory, upon request, and on a first-come, first-served basis up to a cumulative capacity of one percent (1%) of the Company’s single hour peak load in Kentucky during the previous year. If the cumulative generating capacity of net metering systems reaches 1% of the Company’s single hour peak load during the previous year, upon Commission approval, the Company’s obligation to offer net metering to a new customer-generator may be limited. An eligible customer-generator shall mean a retail electric customer of the Company with a generating facility that:

- (1) Generates electricity using solar energy, wind energy, biomass or biogas energy, or hydro energy;
- (2) Has a rated capacity of not greater than forty-five (45) kilowatts;
- (3) Is located on the customer’s premises;
- (4) Is owned and operated by the customer;
- (5) Is connected in parallel with the Company’s electric distribution system; and
- (6) Has the primary purpose of supplying all or part of the customer’s own electricity requirements.

T

At its sole discretion, the Company may provide Net Metering to other customer-generators not meeting all the conditions listed above on a case-by-case basis.

The term “Customer” hereinafter shall refer to any customer requesting or receiving Net Metering services under this tariff.

METERING.

Net energy metering shall be accomplished using a standard kilowatt-hour meter capable of measuring the flow of electricity in two (2) directions. If the existing electrical meter installed at the customer’s facility is not capable of measuring the flow of electricity in two directions, the Company will provide the customer with the appropriate metering at no additional cost to the customer. If the customer requests any additional meter or meters or if distribution upgrades are needed to monitor the flow in each direction, such installations shall be at the customer’s expense.

BILLING/MONTHLY CHARGES.

Monthly charges for energy, and demand where applicable, to serve the customer’s net or total load shall be determined according to the Company’s standard service tariff under which the customer would otherwise be served, absent the customer’s electric generating facility. Energy charges under the customer’s standard tariff shall be applied to the customer’s net energy for the billing period to the extent that the net energy exceeds zero. If the customer’s net energy is zero or negative during the billing period, the customer shall pay only the non- energy charge portions of the standard tariff bill. If the customer’s net energy is negative during a billing period, the customer shall be credited in the next billing period for the kWh difference. If time-of-day metering is used, energy flows in both directions shall be netted and accounted for at the specific time-of-use in accordance with the provisions of the customer’s standard tariff and this Net Metering Service Tariff. When the customer elects to no longer take service under this Net Metering Service Tariff, any unused credit shall revert to the Company. Excess electricity credits are not transferable between customers or locations.
